RAUSHANI KUMARI

Full Stack Developer | AI/ML Developer

Hyderabad, Telangana | +91 91355 80107 | raushanikumari5273@gmail.com

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience building scalable web applications, REST APIs, authentication and role-based access control systems, and AI-powered solutions. Hands-on experience with React.js, Node.js, Express.js, MongoDB, Python, FastAPI, Machine Learning, Generative AI, LLM integration, and e-signature technologies. Experienced across healthcare, digital document signing, and business credit-risk applications, with strengths in API integration, performance optimization, debugging, and production-focused development.

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML5, CSS3, SQL

Frontend: React.js, Responsive Web Design, UI Development, Performance Optimization

Backend: Node.js, Express.js, FastAPI, REST APIs, Authentication & Authorization, RBAC

Databases: MongoDB, SQL, DBMS

AI / Machine Learning: Machine Learning, Generative AI, LLM Integration, AI Chatbots, NLP, Recommendation Systems, AI Summarization

ML / Data: Pandas, Scikit-learn, Ensemble Learning, Model Evaluation

E-Signature / APIs: Aadhaar eSign, Digital Signature Integration, NSDL Integration, API Integration, HMAC/API Keys

Tools & Cloud: Git, GitHub, AWS, Azure

PROFESSIONAL EXPERIENCE

Full Stack Developer | PCRA Technologies Pvt Ltd, Hyderabad *May 2026 – Present*

- Develop full stack applications using React.js, Node.js, Express.js, MongoDB, REST APIs, and Python-based services.
- Build and integrate AI/ML solutions, including a credit-report and credit-scoring model for business risk assessment.
- Develop AI-powered business workflows using Generative AI and LLM integration for domain-specific user queries.
- Implement authentication, authorization, and Role-Based Access Control (RBAC) across application workflows.
- Develop data-intensive dashboards and reporting workflows for sales, receipts, outstanding payments, collections, customer information, and business analytics.
- Optimize backend APIs, database queries, and data-processing workflows for large business datasets.
- Work across frontend, backend, database, ML, and AI components to deliver production-ready features.

Frontend Developer | GALACTIX SOLUTIONS PVT LTD, Hyderabad *March 2024 – April 2026*

- Designed and developed responsive, scalable React.js interfaces for a TeleHealth platform.
- Implemented secure authentication, authorization, and Role-Based Access Control (RBAC) across healthcare workflows.
- Integrated Video SDKs for real-time doctor–patient consultations and supported cross-device compatibility.
- Built and integrated MediBot, a medical-domain AI chatbot using Generative AI and LLM technologies.
- Implemented symptom analysis, doctor recommendation, medical report interpretation, and AI-generated patient summaries.
- Contributed to AI-powered recommendation systems for personalized healthcare workflows.
- Worked with REST APIs, Node.js, Express.js, MongoDB, Git, and GitHub as part of full stack application development.
- Improved frontend quality and maintainability by resolving approximately 700–800 SonarQube issues and reducing code duplication.
- Contributed to UI and product improvements that increased user engagement by approximately 30%.

KEY PROJECTS

MedScore – AI-Based Credit Risk & Credit Scoring Platform | PCRA Technologies *2026*

- Developed an ML-based credit scoring solution using sales, receipts, outstanding, and customer data for business risk assessment.
- Built an ensemble approach using Logistic Regression, Random Forest, Extra Trees, XGBoost, LightGBM, and CatBoost.
- Developed a FastAPI service to expose ML predictions and integrate the model with backend application workflows.
- Implemented risk scoring and risk-band categorization to support credit assessment and reporting.

eSignV – Digital Document & E-Signature Platform | PCRA Technologies *2026*

- Contributed to a digital document signing platform supporting Aadhaar-based eSign and digital signature workflows.
- Integrated NSDL Aadhaar eSign services and handled callback workflows for document signing.
- Worked on API-based document signing, authentication, API keys, HMAC security, credits, documents, and reusable snippets.
- Implemented and improved signing workflows, including multi-page Aadhaar eSign callback handling and document/PDF processing.

• Optimized callback processing and related integrations to improve end-to-end signing performance.

MediBot – Healthcare AI Chatbot | GALACTIX SOLUTIONS PVT LTD *2024 – 2026*

• Designed and integrated a medical-domain AI chatbot using Generative AI and LLM technologies.
• Implemented symptom analysis, doctor recommendation, medical report interpretation, and AI-generated patient summaries.
• Integrated AI capabilities into healthcare workflows while focusing on reliability, privacy, and responsible AI usage.

TeleHealth Platform | GALACTIX SOLUTIONS PVT LTD *2024 – 2026*

• Developed responsive React.js interfaces for a healthcare platform supporting doctor–patient workflows.
• Implemented authentication, authorization, and RBAC across healthcare modules.
• Integrated real-time Video SDK functionality for doctor–patient consultations.
• Worked on frontend performance, responsive design, API integration, and cross-device compatibility.

Healthcare Recommendation & AI Features | GALACTIX SOLUTIONS PVT LTD *2024 – 2026*

• Contributed to AI-powered recommendation workflows for personalized healthcare experiences.
• Worked on symptom analysis, doctor recommendations, report interpretation, and conversation-based patient summaries.
• Collaborated across frontend and AI/ML integrations to bring intelligent features into production applications.

EDUCATION

• B.Sc. (Hons.) Computer Science, University of Delhi | 2021 – 2024 | CGPA: 8.676
• Class XII, CBSE | 94.33%
• Class X, CBSE | 91.4%

CERTIFICATIONS

• Industrial Artificial Intelligence with Cloud Computing | April 2024 – Present

LANGUAGES

• Languages: English (Fluent), Hindi (Fluent)
